PROFESSIONAL SUMMARY

Experienced Software Test Engineer with **4+ years** in both automation and manual testing, specializing in developing scalable and maintainable test automation frameworks. Skilled in end-to-end QA processes including test planning, scripting, execution, defect tracking, and continuous integration. Experienced in tools and technologies such as Selenium, TestNG, REST API testing, Git, Jenkins, and Agile methodologies. Committed to enhancing software quality by driving efficient testing strategies and aligning QA goals with business objectives.

WORK HISTORY

Associate at CTS (Cognizant Technology Solutions), India

January 2025 – Present

- Developed and maintained robust automation frameworks using **Selenium** WebDriver, **TestNG**, **Jenkins**, and **Maven**, implementing the **Page Object Model** to streamline test execution and reduce regression testing effort by **30%** across releases.
- Developed test scripts using **Java**, focusing on scalability, code reusability, and improving overall test coverage for critical business flows. Utilized **Git** for version control and Maven for efficient dependency management and faster project builds, contributing to smoother **CI/CD pipelines**.
- Used **SQL** for backend validation and data integrity checks, enabling early detection and resolution of critical data mismatches. Conducted comprehensive Manual **API Testing** using **Postman** to validate request-response cycles, monitor response times, and ensure API contract compliance.
- Managed test cycles in **Jira** to accelerate QA feedback and improve defect trend visibility, while designing hybrid automation frameworks integrated with CI pipelines to streamline cross-platform test executions.
- Actively contributed to **Agile** ceremonies including sprint planning, backlog grooming, and daily stand-ups, enhancing team collaboration and delivery predictability. Leveraged strong analytical and problem-solving skills to reduce high-priority defect leakage by **25%** and improve overall test efficiency.

Software Testing Engineer at Utthunga Technologies Pvt LTD, India

May 2021 – December 2024

- Led** Agile QA cycles by analyzing requirements, creating detailed test plans and automation scripts, and delivering test strategies and proof of concepts (POCs) to enhance software quality, streamline QA processes, and support business goals through continuous testing and defect tracking.
- Conducted **cross-browser** and data-driven testing to ensure consistent functionality across environments by integrating automation with **CI/CD pipelines** for faster feedback and seamless test execution.
- Mentored** junior QA engineers in test case design, automation scripting, and tools like Selenium and TestNG, while promoting best practices in defect tracking and Agile QA processes.

SKILLS

Programming Languages: Java

Testing Skills: Web Application Testing, API Testing

CI/CD & Automation Tools: Jenkins, Git

Database: SQL Server, Oracle, MySQL

Team leadership & Web application testing

Bug Tracking Tools: Jira, Redmine, Azure DevOps

Test Automation Tools: Selenium, TestNG, Postman

Operating System: Linux/Unix, Windows

Development Tools: Eclipse

EDUCATION

Sambhram Institute of Technology, India

Bachelors in Information Science and Engineering

June 2019
